DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The instant application is directed to a system for use by a sleepy driver of a vehicle. Each independent claim identifies the uniquely distinct combination of features including "the controller accessible via the switch, so that the controller will only activate the signal generator while the motor is on and once activated by the controller switch, the signal generator will only be deactivated by turning the motor off". This patentable distinction is included in all independent claims 1, 2, and 10. The closest prior art, Mostrom (US 5,921,355) and Hershberger (US 4,485,375). Mostrom discloses automobile anti-theft device, and Hershberger discloses grip-responsive dozing driver alarm including a normally closed push button alarm switch is mounted on the steering wheel whereby a driver's hand can concurrently grip the steering wheel and depress the button to keep the alarm switch open. The references, either singularly or in combination, fail to anticipate or render the above limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion.
